MarineTT: Added Value and Benefits

Telmo Carvalho
EurOcean's Executive Director
MarineTT Partner

MarineTT products – added value

- **Infobase of FP6 & FP7 marine projects**
 - Info/statistics/mapping on funding, countries, institutions involved in marine research
 - One standard repository/tool for several European initiatives (e.g. MG4U, Aqualnova, Aquaexcel, Aquamed etc.)
- **Searchable knowledge outputs infobase → tool for knowledge management**
 - Customised search options for different end users/application domains
- **Understanding and mapping of marine value chains including Primary End-Users/Multipliers**
 - To foster knowledge transfer
- **Inventory of clustered knowledge outputs from EC projects**
 - e.g. Databases, directories, Action Plans, Strategies, software, etc.

MarineTT products – added value (cont')

- **Innovative knowledge analysis methodology**
→ Identification of high potential “knowledge outputs” ready for transfer
- **Systems to take knowledge outputs to the Market**
→ Identification and engagement with correct “primary end users”
- **Case studies on knowledge transfer**
→ Measurable evidence of knowledge transfer (transfer, uptake, impact)
- **Needs analysis (bottom-up approach)**
→ Requirements for further marine research
→ Identification of high potential work that merits further support

MarineTT benefits for the marine/maritime

- **Knowledge synergies between research – research**
→ Knowledge clustered and easily searchable / accessible
- **Knowledge transfer between science – industry – policy**
→ Knowledge customised to suit end users preferences and needs
- **Cross fertilisation between marine/maritime domains**
e.g. Marine renewables output of relevance to aquaculture/fisheries
- **This will improve access & use of Europe knowledge resources:**
 - To promote a European knowledge-based economy
 - To support a European knowledge society
